

SANFOOT

NATURAL WOOD VENEER WALLCOVERING

Finishes / Sheen Clarification

Standard SanFoot Natural Wood Wallcovering = The standard **SanFoot** Natural Wood Wallcovering finish consist of 1 seal coat and 1 topcoat of polyurethane with a low sheen level of (30%). The standard **SanFoot** Natural Wood Wallcovering finish is a cleanable finish, Murphy's Oil Soap is recommended to be used once a year to clean the surface and maintain the beauty of the wood grain. Standard **SanFoot** Natural Wood Wallcovering can be ordered with custom stain as an option. If Standard **SanFoot** Natural Wood Wallcovering is ordered with the option custom stain, it then becomes a "Custom Order" and requires a 400 Sq. Ft. minimum order and is subject to a 10% overrun.

SanFoot Natural Wood Wallcovering with "Elite Finish" = The "Elite Finish" **SanFoot** Natural Wood Wallcovering consist of 1 seal coat and 2 topcoats of polyurethane, with either a low sheen (30%) or a semi-high sheen (70%) available upon request. "Elite Finish" **SanFoot** finish has a filled grain like appearance on most species. "Elite Finish" **SanFoot** Natural Wood Wallcovering can be ordered with custom stain. "Elite Finish" is for use in high traffic areas and offers a washable finish, it can be cleaned with "409" and "Fantastic" cleaners but no bleach can be used. Level-5 drywall finish is required on walls using "Elite Finish" **SanFoot** Natural Wood Wallcovering. "Elite Finish" **SanFoot** Natural Wood Wallcovering requires a 400 Sq. Ft. minimum order and is subject to a 10% overrun. An "Elite Finish" order is considered a "Custom Order" and falls under the guidelines of that condition.

Please keep in mind that we DO NOT copy sheen levels on sample finishes. We only offer the above finishes and sheens.

If you have any questions concerning the different Finishes available on **SanFoot** Natural Wood Wallcovering please call your local **SanFoot** Natural Wood Wallcovering Distributor or Jacaranda, Inc.
