

# LIGHT DIFFUSERS

**MirroFlex™ Light Diffusers** are designed to replace existing prismatic diffusers in drop ceiling systems and add up to 30% brighter, more pleasing light. Unlike most ceiling lights which direct light downward causing computer screen glare, diffusers direct light from side-to-side creating evenly dispersed illumination – ideal for office work environments.

Designed to fit 2' x 2' (Wavation pattern only) and 2' x 4' lightbox fixtures, our diffusers have tegular/revealed edges for easy installation.

With a simple change to light diffusers, you can add a contemporary look to standard fluorescent light diffusers typically found in commercial interiors.

## FEATURES

# LIGHT DIFFUSERS: BEST WESTERN HOTELS & RESORTS

## UNITED STATES

WHEN THE BEST WESTERN NEEDED A SOLUTION FOR THEIR CEILINGS,  
ATI HAD JUST THE SOLUTION THEY WERE LOOKING FOR.

As a leader in the hospitality industry, Best Western strives to provide their travelers with comfortable, clean and relaxing accommodations for a memorable experience. An attractive design is essential to provide guests with the “home away from home” feeling, and lighting is one of the things that ties everything together. Best Western needed a solution.

The design team wanted to incorporate a contemporary design in the new lighting element without installation challenges and minimal expense. ATI worked with the design team to provide a decorative solution that would create ambient lighting throughout the hotel, but bright

enough for functionality. MirroFlex™ Light Diffusers were chosen to replace existing prismatic diffusers throughout their hotels to add brighter, more pleasing light. Each design is deeply textured and is easily installed. The Wavation design can be cut-to-size to fit most custom light fixtures.

Best Western was pleased with the product’s creativity and affordability, and decided to elevate their brand by creating a unified, contemporary design using ATI’s light diffusers throughout a number of its locations. ATI Decorative Laminates is now an Endorsed Supplier of Best Western Hotels and Resorts across the U.S.
