ACOUSTIC RECYCLED TEXTILES

Fosshield technology

Fosshield®, an FDA cleared antimicrobial technology incorporating silver and copper ions into the fiber which naturally attack microbes thus delivering surface protection in addition to odor, mold, and bacteria resistance.

Antimicrobial ion exchange with microbe surface ions to suppress growth

This antimicrobial technology makes the perfect solution for healthcare, living, and workspaces with the added benefit of noise mitigation and visual beauty.

“The fiber technology featured in Fosshield® works against the types of airborne bacteria we are most concerned about. This type of ‘capture and kill’ technology is ideal. It’s the silver bullet against bacteria.”

- DR. CHARLES GERBA
