### **Sustainability**

---

Linen and viscose are 100% renewable natural resources.  
The backing is FSC certified, FSC A000531.  
In production, all energy sources are either green, wind or hydro based and all processes are waterbased.  
The products do not contain PVC, chlorine, plasticizers, heavy metals or harmful dyes.

### **Supply and packing**

---

Delivery from stock by the full linear meter or full linear yard.  
The average piece length of this quality is approx. 50 linear meter or 55 linear yards. However, as is common within the textile industry, it is not possible to establish a standard roll length.  
The wallcovering is reeled on to a cardboard core, wrapped in polyethylene and protective end caps are fixed. Each roll is then packed in individual cardboard boxes or tubes.

### **Harmonized System as per the World Customs Organization and Origin**
