**Permeability, Moisture and Mold:**

Contains anti-microbial additives to resist the growth of mildew and bacteria and pass ASTM G-21. These additives will not prevent mold growth if residual wall moisture is in excess of 4% and/or is allowed to accumulate in or behind the walls.

Vinyl wallcovering can act as a vapor barrier and consequently should NOT be installed on walls that are susceptible to excessive condensation or moisture infiltration.

Breathe Free™ Micro-vented wallcovering from DeNovo Wall can be used to help control un-wanted moisture inside a building envelope.
